ABOUT

Masakazu is a MIT EECS student currently taking a GAP year program at MakeSchool.

WORK EXPERIENCE

iOS/Web/Backend Programmer/Developer, MakeSchool

August 2014 - Present

The MakeSchool Gap Year is a 1 year college supplement that prepares students for a career as a founder or developer. Students learn mobile and web development, computer science theory, and development focused career skills. The Gap Year culminates with an internship at a tech startup. Students frequently meet founders and developers to build a network in Silicon Valley.

Teacher, CodeMentor

October 2014 - Present

Codementor connects people with experts for urgent one on one issue solving, technical advice, pair programming, and code review.

iOS Programmer/Developer, MakeGamesWithUs

June 2014 - August 2014

Summer Program that focuses on shipping one's own iOS game

SKILLS

Web developement

HT ML

JavaScript

Mobile developement

iOS/Objective-C

Android/Java

Backend developement

NodeJS

MongoDB

Express

Tools

SpriteBuilder

Cocos2d

XCode

EDUCATION

Undergraduate, Electrical Engineering & Computer Science - Massachusetts Institution of Technology

August 2014 - Present

Undergraduate, Mathematics/ComputerScience/Physics - College of San Mateo

January 2012 - June 2014

GPA: 3.5

COURSES

- Into to Programming: Java
- Java: Data Structures
- C++: Programming
- C++: Data Structures
- Multivariable Calculus
- Linear Algebra
- Differential Equations

Undergradutate, Mathematics/ComputerScience - Foothill College

August 2013 - January 2014

GPA: 4.0

COURSES

- Intermediate Java
- Discrete Mathematics

AWARDS

1st Place CodeDay Hackathon - CodeDay

10 February 2014

At this 24 hour hackthon, I presented my Android mobile alarm clock application that requires users to solve programmically generated calculus problems prior to turning off the alarm.
