Work

The MakeSchool Gap Year is a 1 year college supplement that prepares students for a career as a founder or developer. Students learn mobile and web development, computer science theory, and development focused career skills. The Gap Year culminates with an internship at a tech startup. Students frequently meet founders and developers to build a network in Silicon Valley.

CodeMentor

2014-10-01 –

Teacher

www.codementor.com

Codementor connects people with experts for urgent one on one issue solving, technical advice, pair programming, and code review.

MakeGamesWithUs

2014-06-01 – 2014-08-01

iOS Programmer/Developer

www.makegameswith.us

Summer Program that focuses on shipping one's own iOS game

Education

Massachusetts Institution of Technology

2014-08-20 –

🎓 Electrical Engineering & Computer Science
Undergraduate

College of San Mateo

2012-01-10 – 2014-06-20

🎓 Mathematics/ComputerScience/Physics
Undergraduate

Courses

- Into to Programming: Java
- Java: Data Structures
- C++: Programming
- C++: Data Structures
- Multivariable Calculus
- Linear Algebra
- Differential Equations

Courses

- Intermediate Java
- Discrete Mathematics

Awards

1st Place CodeDay Hackathon

by CodeDay

Awarded 2014-02-10

At this 24 hour hackthon, I presented my Android mobile alarm clock application that requires users to solve programmically generated calculus problems prior to turning off the alarm.

Skills

Web developement

- HTML
- JavaScript

Mobile developement

- iOS/Objective-C
- Android/Java

Backend developement

- NodeJS
- MongoDB
- Express

Tools

- SpriteBuilder
- Cocos2d

- XCode

Languages

Japanese

Fluent

Chinese
